Abstract (en)
[origin: WO2010105804A1] The invention relates to a fall protection device for trampolines (8), having at least one preferably substantially non-resilient rope (10), which can be connected to a user (1) of the trampoline, at least one tracking device (12), which holds the rope (10) taut when using the fall protection device, and with an apparatus (13) for limiting the rope extension. When swinging on the trampoline (8) the rope (10) is pulled out and pulled back in and hold taut by means of the tracking device (12). In case of falling, the rope extension is limited by the apparatus (13) for limiting the rope extension.
