Abstract (en)

[origin: WO2010102860A1] The invention relates to a bead massage device, including a vessel for receiving a plurality of beads submerged in a bath, and a means for driving said beads so that the beads are moved when contacting a human limb inserted into said vessel, characterised in that the driving means includes at least one inner wall of the vessel with which said beads are brought into contact, said vessel being rotatably mounted. The vessel is preferably removable so that it can be easily cleaned and disinfected.
