Abstract (en)
[origin: WO2010106189A1] The present invention relates to composite elements comprising a first and a second cover layer, a foam layer being provided between the first and second cover layers and the interface between the foam layer and at least one cover layer comprising a bonding agent layer, characterized in that the bonding agent layer contains a hot-liquid hot-melt adhesive that is solid at room temperature. The present invention further relates to a method for producing the same.
