Abstract (en)

[origin: WO2010106160A2] The invention relates to an assembly for removing a medium from a pressurised container (50), said assembly having a cut-off valve (74) that is located on an outlet line (73) for the container (50) and a sensor (71) for detecting the pressure prevailing in the container (50). The assembly is also provided with a control unit (72) that controls the cut-off valve (74) on the basis of the pressure determined by the sensor (71) in order to remove the desired quantity of medium.
