Abstract (en)
[origin: WO2010105281A1] The invention relates to a drive system (4) for opening and/or closing furniture parts (1, 2) which are articulated so as to pivot relative to each other by way of a hinge (3) comprising a hinge cup and a hinge arm, comprising an electric drive designed as a self-contained component, wherein the electric drive comprises an electric motor (18) and an actuating apparatus (8) for transmitting power and/or torque from the electric motor to the hinge (3), wherein the actuating apparatus (8) comprises a fastening point (9) by which the actuating apparatus (8) can be detachably connected to the hinge (3).
