Abstract (en)

[origin: EP2230426A1] The actuator (1) has a carriage (10) constituted by a plate and guided in translation in a casing (3) between an arming position and a triggered position. The carriage includes a stop (12) for stopping an arming unit (30) to drive the carriage from the triggered position to the arming position to separate the stop at the end of travel of arming. The carriage includes a control circuit (5) for permitting control in triggering on a magnetic lifter (60) and on the arming unit for arming movement of the carriage.
