Abstract (en)

[origin: WO2010105860A1] The invention relates to status detection device (1) to be fastened to a living being (22), in particular to a human being (21), in order to detect the position of the body (23) of the living being (22), comprising a first sensor (6), designed as an acceleration sensor (7) and/or a gyroscopic sensor (9). A further, second sensor (11), designed as a height-measuring sensor (13), is provided. The invention further relates to a corresponding method.
