Abstract (en)

[origin: WO2010105665A1] In order to overcome this problem, a method is provided for data processing in a mobile communication network, wherein measurement information is conveyed from a first central node to a second central node, and wherein said measurement information is provided by at least one base station to the first central node and/or to the second central node. Also, a corresponding device as well as a communication system comprising such a device are suggested.
