Abstract (en)

    A method for operating a training device (100) is provided. According to the method, a property of a user using the training device (100) during a training session is automatically determined, and a fitness level of the user is automatically determined from the user property. Based on the fitness level of the user a performance of a virtual opponent is automatically defined, and information representing the performance of the virtual opponent is output to the user.
