Abstract (en)

[origin: EP2409741A1] The board i.e. ski (10), has a front part, a middle part and a rear part with a contact surface (18) including a running surface (12) and steel edges (14), which enclose the running surface. The contact surface comprises a curvature progression including a positive curvature without turning points from a central contact line in the middle part to the front and rear parts in an unloaded condition of the board. The middle part includes a horizontal tangent. A layout of the board is laterally fitted. A lateral curve of the fitting is composed of different radii ranging between 10 and 30 m.
