Abstract (en)
[origin: EP2409772A1] The shower head element (100) has a housing (110) formed by a hollow chamber (111) divided into multiple component chambers. An outer periphery of the housing is designed in a concave manner in an inlet area (116). The inlet area is formed by an inlet opening (112) to the component chambers. The distributor element (120) is pivotally mounted at a support member (130) connected to the housing.
