Abstract (en)
[origin: EP2409933A1] The holder i.e. unit loading device (1), has a base body (4) accommodating transport goods and made of plastic. Reinforcing elements are embedded into the plastic used for forming the base body. The reinforcing elements are formed by fibers, particles and/or hollow bodies. The hollow bodies and/or hollow spaces are foamed at the base body, which is formed of two modules. The modules are detachably connected together in a snap-fit manner. Wall elements (5a-5c) and cover elements (6a, 6b) are arranged at the base body for forming the unit loading device.
