Abstract (en)

The control circuit has a single hydraulic variable displacement pump (10) and a hydraulic motor (20) utilized for driving fans, where driving torque of the hydraulic motor is controlled by adjusting an absorption volume of the hydraulic motor. A speed of the fans is adjustable by the hydraulic motor, and the displacement pump is provided in the control circuit. A control of the driving torque and/or of the fan speed is steplessly varied between standstill of the fans and maximum fan speed, where the fans and/or the hydraulic motor are connected in parallel to each other.

Abstract (de)

Die vorliegende Erfindung betrifft einen hydraulischen Lüfterregelkreislauf für eine Maschine, insbesondere für ein Kraftfahrzeug, eine Baumaschine bzw. ein Hebegerät, mit wenigstens einer Hydraulikpumpe und wenigstens einem Hydraulikmotor zum Antrieb wenigstens eines Lüfters, wobei das Hydraulikmotorantriebsmoment wenigstens eines Hydraulikmotors mittels Einstellung des Schluckvolumens steuerbar ist.
