Abstract (en)
[origin: EP2410269A2] A refrigerator is disclosed. The refrigerator includes a cabinet comprising a storage compartment; a door rotatably provided in the cabinet, the door opening/closing the storage compartment; an subsidiary storage compartment provided in the door, with an open rear surface; and an opening/closing device provided in a rear surface of the door to open and close the rear surface of the subsidiary storage compartment. The opening/closing device includes a supporting member coupled to the subsidiary storage compartment; and a blocking member wound around the supporting member in a roll type.
