Abstract (en)
[origin: EP2410270A2] A refrigerator is disclosed. The present invention includes a body having at least one storage space, a door mounted to the body to selectively open/close the storage space, at least one rail part provided to a backside of the door, and a basket assembly including a basket and a sliding module guided along the rail part together with the basket, the sliding module to be selectively fixed to the rail part by a lever.
