Abstract (en)
[origin: WO2010108506A1] The present invention relates to novel active ingredient combinations, comprising at least one known compound of formula (I), in which R1 and A have the meanings as stated in the description, and at least one further known active ingredient of the class of chitin synthesis inhibitors, molting hormone agonists or other classes, and are well suited for controlling animal pests, such as insects and undesired acarids.
