Abstract (en)

[origin: WO2010110993A2] Isolated compounds and combinations of isolated compounds isolated from Scutellaria barbata D. Don are effective in the generation of reactive oxygen species, induction of DNA damage and induction of apoptosis in cancer cells. The compounds and combinations may be prepared as pharmaceutical compositions for administration to mammals, such as humans, for the treatment of solid cancers, such as epithelial cancers. Such epithelial cancers include breast cancer and ovarian cancers.
