Abstract (en)
[origin: WO2010111185A2] A booster system for use with a garden hose includes a water pump, a garden hose, and a hose structure. The water pump has a motor and is designed to produce a maximum water pressure of less than 1000 psi. The garden hose connector is connected to the pump. The hose storage structure for holding a garden hose is proximate to the pump. The booster system also includes a switch for engaging and disengaging the pump.
