Abstract (en)  
[origin: EP2233286A1] The method involves pressing a plate body (21) with a sheet of printed paper and/or a resin layer. The printed paper is printed with a decoration by a printing device. The printed paper is divided into printed sheets (18) before the pressing. A decorative template is prepared before printing the decoration and displayed in red, green and blue-color system on a display device of a computing device. The printing device is provided with a digital printing unit and a deep printing unit. The digital or deep printing unit is used for printing the decoration depending on amount of printed papers. Red, green and blue data are converted into cyan-magenta-yellow-black data of the color system. Independent claims are also included for the following: (1) a device for executing a method for manufacturing plate bodies (2) a plate body comprising a base body.
