Abstract (en)

[origin: WO2010108841A2] The invention relates to a device (10) for filling a thin-walled transport container (12) with securities. The device (10) comprises a supply unit (100) for supplying the securities and a stacking unit (200) for stacking the supplied securities. The device (10) further comprises a receiving unit (400) for receiving the thin-walled transport container (12), a holding unit (600) for holding a first closure element (18) and a second closure element (20) for closing the thin-walled transport container (12), a displacement unit (700) for displacing a stack of securities (200) produced with the aid of the stacking unit (200) into the thin-walled transport container (12), a retaining unit (500) for retaining securities transported into the thin-walled transport container (12) in the orientation in which they were supplied to the transport container (12) and/or a closure unit (300) for closing a closure unit (18, 20) and closing the opening of the thin-walled transport container (12).
