Abstract (en)
[origin: WO2010108526A1] The invention relates to a mounting profile and to a clamping device for clamping a flexible surface element. The invention further relates to a façade element for a building, wherein the façade element comprises the clamping device and the flexible surface element clamped therein. The mounting profile comprises: a base body (110a); an attachment device for attaching the surface element (200) to the base body (110a); a spring element (150), and a clamping profile (120) compliantly supported on the base body (110a) by means of the spring element (150).
