Abstract (en)
[origin: WO2010108305A1] A LED lighting lamp comprises a first level heat sink comprising a substrate (108), a second level heat sink comprising at least one stand (102) connected to the substrate (108) and at least one LED lighting element (101) mounted on the at least one stand (102). The LED lighting lamp provides improved heat dissipation efficiency, wide illumination beam angles and substantially uniform illumination intensity.
