Abstract (en)

[origin: WO2010108563A2] The invention relates to a portable microphone arrangement for locating sound sources, having a plurality of microphones (1-5) that can be attached to the clothing of a person. The microphone arrangement comprises a plurality of microphones spaced apart from each other on a substantially circular arc-shaped, preferably ring-shaped, formed support element that can be attached on or in the collar of an article of clothing.
