Abstract (en)

[origin: WO2010108713A1] The invention relates to a five-beam laser device that is designed in a self-leveling way and comprises three laser sources (21, 61), wherein two laser beams created by the laser sources (21) are each divided into two partial beams, wherein one of the partial beams in each case meets with the beam of the third laser source (61) at a point P.
