Abstract (en)
A nozzle for a hair dryer includes a nozzle body (1). An engagement structure (11) detachably connected to an air outlet of the hair dryer (3) is provided on one end of the nozzle body (1), the other end of which is connected to a rotational body (2). An air-flowing channel extending through the rotational body (2) in the axial direction of the rotational body (2) is provided inside the rotational body (2). Circular air outlets (21) are uniformly distributed on the rotational surface of the rotational body (2), and bar-shaped air outlets (22) are uniformly provided on the top end portion of the rotational body (2) in the circumferential direction.
