Abstract (en)

[origin: EP2412499A1] The machine has a counter holding device (50a) for holding sawing components (11a) in a pivoting position, where the holding device is operated by a hand of an operator holding a guide handle (34a). The holding device is attached to the guide handle and has a counter holding body (56a) arranged in a guide plate, where the holding body and the guide handle are simultaneously engaged by the hand of the operator. An operating element is arranged in the guide handle for moving a holding contour (61) of the sawing components in a holding contact of the holding body.
