Abstract (en)
The platform (1) has a fixing device provided for fixing the platform on a transport medium (5) e.g. container wagon. Running rails (4) are arranged at an outer side of a base body (3) in a longitudinal direction. A stake (8) is arranged at an end of the base body. A recess is provided at a lower side of the base body. A load protection device is provided at the base body. The load protection device is formed by a belt winder (11), where a belt (12) of the winder runs between outer sides of the base body and rails. The base body is designed as a steel carrier construction unit.
