Abstract (en)  
[origin: EP2412657A1] In an elevator control panel having a face cover, which is divided into upper and lower sections, the operation to mount the face cover is made to be simple, and the divided part of the face cover is made with good looks. To achieve the above object, the control panel comprises: an upper cover which is provided at the upper side of the surface of the control panel and can slide vertically; an fitting member which is disposed below the lower end of the upper cover and provided inside the upper cover, the fitting member having an fitting face extending inwardly in a horizontal direction; a lower cover which is provided at the lower side of the surface of the control panel; and a guide member which is provided inside the lower cover and below the upper end thereof, the guide member having a guide face which fits with the fitting face in such a way that the lower end of the upper cover and the upper end of the lower cover are brought into contact with each other.
