Abstract (en)
The present invention concerns a laundry dryer machine comprising a rotary drum that has a laundry drying cavity, a loading/unloading opening for access to said drying cavity, a door (22) for closing/opening said loading/unloading opening, means for extracting water from the laundry contained in the drying cavity, a collection container (18) defining an inner volume in which the water extracted from the laundry is received, said collection container (18) being adapted to be removably mounted to said door (22), said door comprising a seat (30, 31) for engagingly receiving an engagement portion (24) of the container when the latter is mounted to the door. Said seat extends vertically along less than half the vertical extension of the collection container (18).
