Abstract (en)

[origin: EP2412874A2] The element (10) has a front protective wall (1) and an underlying frame (2). The protective wall is mounted at the frame and has rigid rods (3) which are mounted at the frame on the rear side. A support or anchoring of the element is provided in the base or in the ground. The protection wall made of log wood (11) mounted horizontally and parallelly together at the frame. The frame is made of carriers (4,5) in form of a frame.
