Abstract (en)
[origin: EP2412876A2] The arrangement has a displaceable locking element (54) displaced from an unlocked position into a locked position in which a locking element is extended through openings (38, 52, 52'). The locking element is connected to an actuation element (58), which is arranged parallel to the locking element, by a connection element (56). The actuation element is actuated by external force, and the locking element is displaced by the connection element and by actuation of the actuation element from the unlocked position into the locked position.
