Abstract (en)

A hangar, comprising: a bearing structure (2) having a plurality of arcades (5, 105) composed by one or more structural elements (6, 106) firmly associated to each other; one or more covering elements (3) associated to one or more of the structural elements (6, 106) and among which first covering elements (4, 104) are of rigid type; anchoring means (26) for anchoring the first rigid covering elements (4, 104) to the structural elements (6, 106). The anchoring means (26) comprise a hooking element (27, 127) wherein: the base portion (28, 128) is associated to the portion (29, 129), which faces the base portion, of the structural element (6, 106); the head portion (30, 130) comprises a box-like body (32) having one or more longitudinal grooves (33) for slidably housing a longitudinal rib (23) present at the ends of the covering elements (3); an intermediate portion interposed between the head portion (30, 130) and the base portion (28, 128) defining a channel (31, 131) for the sliding insertion of side end areas of first rigid covering elements (4, 104).
