Abstract (en)
[origin: WO2010112593A1] The invention relates to a retracting device, in particular for drawers, sliding doors, hinged doors etc., comprising a coupling element which can be impinged upon by a spring (13) which can be adjusted between a retraction position and a deployed position. According to the invention, in order to allow the drawers to open in a user-friendly manner, a sliding arrangement (20) can be coupled directly or indirectly to the coupling element, and a sliding element (21) of said sliding arrangement can be adjusted when actuating said sliding arrangement.
