Abstract (en)
[origin: WO2010109506A2] A self -bearing furniture module or element (1) is described, made of a die-cast aluminium alloy, and comprising: an elongated supporting structure (3) with two ends (5, 7) and equipped with at least one first engaging element (9, 11); at least one bearing component (12, 14) connected to the supporting structure (3) adjacent to the first engaging element (9, 11); and at least one engaging component (16, 18) connected to the supporting structure (3) in a central part thereof at the same distance from the two ends (5, 7); the engaging component (16, 18) is equipped with at least one second engaging element (20, 22) and is adapted to engage a respective bearing component (12, 14) of another furniture module or element through operative coupling of the corresponding first and second engaging elements (9, 11 and 20, 22). A process is also described, for the possible surface finishing of such furniture module or element (1).
