Abstract (en)

[origin: WO2010112415A1] The invention relates to a fire protection device for transitions (3) between cars (2) of rail vehicles having a transition (3) between two cars (2) of a rail vehicle and a fluid-fed fire-fighting device. Effective fire-fighting at low weight is possible in that the fire-fighting device has at least one fluid mist nozzle (4) producing fluid mist, wherein the at least one fluid mist nozzle (4) is aligned such that the fluid mist is sprayed into the transition (3).
