Abstract (en)  
[origin: WO2010112744A2] The invention relates to a handling bag comprising: means for attaching the bag to lifting equipment; a housing made of a synthetic textile, having an upper opening, a bottom and side walls, for forming the receptacle for materials or items to be handled. The attachment means consist of one or more straps passing under the bottom of the housing, which are rigidly connected to the side walls of the housing and free relative to the bottom.
