Abstract (en)

[origin: WO2010113003A1] A system for fixing photovoltaic modula (1) on a covering cope with sloping pitch, consisting of box profile or corrugated sheets (2) provided with a plurality of ridges (3) and channels (4) alternated with each other, characterized in that it comprises: a shaped profile (5) for distributing the load arranged parallel to the slope of the pitch and that can be fixed with reversible means (6) to the ridges (3) of said sheets (2); brackets (7) for clamping said photovoltaic modula (1) to said shaped profile (5), wherein said shaped profile (5) comprises at least two areas (8) for continuous support and fixing to two ridges (3) of said sheets (2), and at least one flat area (9) placed in correspondence with a channel (4) of said sheets (2) for supporting modula (1) and for fixing said brackets (7) with reversible means (10).
