Abstract (en)
[origin: CA2763103A1] The invention relates to an eccentric adjusting element (10) having a pin (18) having a profiled section (20) at at least one free end, and an external thread (22) connecting thereto at the end side and having a lesser diameter, wherein an eccentric disc (24) is placed on the profiled segment (20), said disc being secured by a nut (28) threaded onto the external thread, and a hollow cylindrical or tube-shaped spacer (26) is mounted between the eccentric disc (24) and the nut (28), and a method for threading such an eccentric adjusting element.
