Abstract (en)

[origin: WO2010111990A1] The invention relates to a connecting assembly between a shaft journal (1) and a constant velocity rotary joint (2), comprising a joint inner part (3) and a joint outer part, wherein the shaft journal (1) non-rotatably engages in one of the joint parts (3), wherein the shaft journal and the constant velocity rotary joint are two components. According to the invention, at least one bracing sleeve (4) is provided, the bracing sleeve is axially secured on one of the components, and the bracing sleeve comprises at least one elastic element (5) which can be latched into the contour of the other component.
