Abstract (en)

[origin: WO2010112604A1] The invention relates to a method for virtually extending and enhancing the field of view of the common image of a scene created by a video comprising a plurality of images. Said method comprises the following steps: (a-) extending said field of view by at least one mosaic produced from said images and by inserting at least one contextual datum in the repository of the common image of said scene; and (b-) enhancing said field of view by at least one piece of information referenced in said contextual datum.
