Abstract (en)

[origin: WO2010111725A1] A lamp, preferably for illuminating advertising or for effect lighting, comprising a defined light emission region, at least one gas discharge lamp (2) which illuminates a light chamber (LK) and shines out of the light emission region with a defined light color and brightness, at least one organic light-emitting diode (1) which is disposed in the light emission region (LB) of the lamp and when activated changes the light color and/or the brightness for at least one part of the light emission region (LB), wherein the organic light-emitting diode (1) has a plurality of partial regions, and the partial regions can be selectively actuated and activated.
