Abstract (en)  
[origin: WO2010112167A2] The invention relates to a housing assembly having a container (10) comprising a base (14), a front wall (16), a rear wall (18) and two side walls (20), for receiving at least one connecting element (22) for the connection of electric cables (26). The container (10) has at least one opening (24) for electric cables (26), and a lid (12) that can close the container (10). According to the invention, the lid (12) can be mounted on the container (10) such that it can be pivoted, wherein the pivot axis (30) of the lid (12) is arranged abutting the two side walls (20) at the rear wall (18) of the container (10). Furthermore, the rear wall (18) of the container (10) has a greater height than the front wall (16) of the container (10), wherein the side walls (20) are configured such that the height thereof drops off from the rear wall (18) toward the front wall (16).
