Abstract (en)

[origin: EP2415556A1] The drive has short-stroke motor (3) such as linear motor and a pulse decoupling device (2) for control engineering decoupling of pulses of the short-stroke motor of the production machine (1). One component of pulse decoupling device is used for adjusting an operating point of motor. The pulse decoupling device is additionally provided with function of operating-point adjustment. An independent claim is included for machine used in industrial production.
