Abstract (en)
[origin: EP2415681A1] The device (21) has four post elements arranged between a base element (22) and a roof element (23), where the device is made of metal. One of the base element or the roof element comprises slots for insertion of wall elements, where the base element is formed as a pallet plate (25) and the roof element is formed as a frame element (24). The slots comprise an importer extension at an opening end. The frame element is separated from the base element and the roof element.
