Abstract (en)
Bag, for packaging fruits and vegetables, which comprises a flexible tubular wrapping that accommodates the product in the central portion thereof, the two end longitudinal portions of the tubular wrapping being empty, closed and mutually and inseparably joined, said join defining a single closure zone of the bag, common to both ends of the tubular wrapping, said end longitudinal portions forming a handle for gripping of the bag and from which, when the bag is gripped, said central portion of the wrapping and, consequently, the product housed within, is suspended, the handle possibly being provided with a transverse strip that joins individual points that are contiguous to the central portion of the tubular wrapping, an arched bag portion that constitutes the handle proper being defined above the transverse strip.
