Abstract (en)  
[origin: EP2415924A1] A top-loading laundry machine comprises a cabinet (105) housing a rotatable drum (120) having an access opening (205) with associated therewith a door (210), the door (210) comprising a first and a second door wings (210a,210b) hinged to the drum (120) in correspondence of said access opening (205) and being movable between an open position and a closed position, a door retaining/opening device (325) being associated with one among the first and second door wings (210a,210b) for selectively retaining and allowing the opening of the door (210). The door retaining/opening device comprises a pushbutton (330) associated with and movable with respect to said one among the first and second door wings (210a,210b), the pushbutton (330) comprising a seat configured to be engageable by an engaging element (225) provided on the other door wing (210a) in the closed position, for preventing the door (210) from opening.
