Abstract (en)  
[origin: EP2416024A2] The linear roller bearing (10) has multiple individual segments (20), where each segment has a support plate (15) clustered around a central axis (14) of the bearing. Holding elements (40) are arranged at front ends of a cage element (22) outside a circulation area of rolling bodies (13). The segments hold or connect each other to a self-holding bearing bush in a circumferential direction.
