Abstract (en)
A modular lighting apparatus, comprising an inner module (2), which can be inserted in an outer module (3) having the function of supporting and protecting the inner module. The inner module comprises a frame (4) adapted to support a lighting device (5). The frame (4) has a base structure which is mechanically associated with the outer module (3) and a modular superstructure adapted to support different types of lighting device (5). The frame (4) comprises a base structure constituted by uprights (7) connected to a base plate (8).
