Abstract (en)

[origin: EP2416595A1] The hearing instrument comprises housing (2) and a frame (3) which is arranged in the housing, where a fixation device is arranged at the frame. The housing comprises a fixing opening (4) and an installation opening (11) which is provided in a spatial direction (A,C). The fixing device comprises a latch (5) which is inserted in the fixing opening. An independent claim is also included for a frame with a signal processing device.
