Abstract (en)
[origin: WO2010118189A1] Container (200) for holding a product, such as an electronics item, in combination with a releasable security member (108) insertable into the container for inhibiting removal of the product from the container, e.g. by inhibiting access to the product by locking the container in a closed configuration. The container is adapted, e.g. by providing one or more latching features (231, 232) therein, actuated by the presence of a part of the security member received within the container and the security member has at least one projection (109, 110) for inserting into the container, e.g. through a slot (230).
